SUMMARY

As a Game Developer with 3 years of experience, I have increased my skills in creating engaging and innovative digital experiences. My journey in game development has equipped me with a strong foundation in programming, problem-solving, and creative thinking. However, I am now looking to transition into the another area which is Full Stack Web Development or Artificial Intelligence.

I am an effective communicator who values efficiency in teamwork. I always strive to thrive in collaborative environments by helping others and contributing to the team's success. I also perform my best under pressure, maintaining a calm and focused approach to meet tight deadlines and challenging objectives.

EDUCATION

Bachelor Computer Science

Universidade da Maia

📅 2018 - 2022   📍 Maia

EXPERIENCE

Game/Front End Developer

LudusCristaltec

📅 2018 - Present   📍 Porto

LudusCristalTec is an Italian company specializing in the design and development of electronic games and gaming machines.

- Developed the "Game Feed" which is an integral component that offers users a view of previous gameplay.
- Developed an extensive "Info" section by implementing a system to receive JSON data and dynamically build elements using JavaScript functions based on the JSON values.
- I also specialize in developing casino slot games for both mobile and laptop platforms using the company proprietary language, which is rooted in C.

Front End Developer

ITSector

📅 2019 - 2019   📍 Porto

ITSector is a technology company that focuses on providing software development and IT solutions, primarily for the financial sector. The company is known in creating innovative, high-quality software products and services that cater to the needs of banks, insurance companies, and other financial institutions.

- Developed the company internal website for ITSector, focusing on Front-End Development improving its interactivity and visual appeal of the website.
- Progressed towards my second year of University with practical application of my skills with Javascript, HTML and CSS.
